Powers Educational (Split Reel).

Released August 10.

JUL 29 1916

Salmon are shown just a few hours old, with their translucent bodies and globular heads. They grow and after grubbing for several years in mountain brooks, make their way to the sea. After a few more years they return to spawn and are killed as they jump up the waterfalls, and then friend Salmon finds his grave in the "tummie" of some hungry human.
